

CATHERINE DE GUZMAN

IT Graduate | Software Developer & Business Analyst

Bulacan, Philippines | catherinedeguzman.work@gmail.com | +63-908-384-1496 | linkedin.com/in/catedeguzman

PROFILE

BS Information Technology graduate (Magna Cum Laude, Major in Software Development) who combines hands-on web development experience – HTML, CSS, JavaScript, React, and REST API testing with Postman – with 5+ years of professional experience in requirements gathering, stakeholder engagement, and governance reporting. Comfortable building and testing technical solutions and translating business needs into clear specifications. Complements this with SAP Basis training and an SAP End-to-End Business Processes certification.

TECHNICAL & BUSINESS PROJECTS

Capstone Project – IT Systems Development – *Mapua Malayan Digital College* Aug 2022 – Apr 2026

- Led end-to-end project delivery using Agile methodology – defined scope, ran sprint planning, tracked milestones, and facilitated retrospectives.
- Created process flows, user journeys, and technical specifications to support system design and requirements documentation.
- Built responsive web applications using HTML, CSS, JavaScript, and React; integrated and tested REST APIs using Postman.

SAP Basis Trainee / Intern – *Accenture* Feb 2026 – Apr 2026

- Trained in SAP Basis administration – system configuration, user/role and authorization management, and monitoring within an enterprise SAP landscape.

PROFESSIONAL EXPERIENCE

Customer Solutions Manager – *Sutherland* Jan 2020 – Mar 2025

- Led client workshops and stakeholder discussions to analyze process and reporting requirements, driving governance for employee verification processes to 100% on-time completion across a large workforce portfolio.
- Built MS Excel dashboards for compliance and performance reporting, giving leadership real-time visibility into status, trends, and risk indicators.
- Partnered across operations, product, and engineering teams to unblock execution issues, resolve escalations, and keep initiatives on track.
- Conducted root cause analysis on recurring operational issues, translating findings into process improvements and recommendations.

Login Administrator – *Sutherland* Aug 2018 – Dec 2019

- Managed user roles, permissions, and access controls in line with security policy and governance standards; conducted system audits and risk assessments.

EDUCATION

Bachelor of Science in Information Technology Aug 2022 – Aug 2026

Major in Software Development – Magna Cum Laude

Mapua Malayan Digital College
